DEPARTMENT OF INFORMATION TECHNOLOGY
Lucerne University of Applied Sciences and Arts
6343 Rotkreuz, Switzerland

22. und 23. August 2025

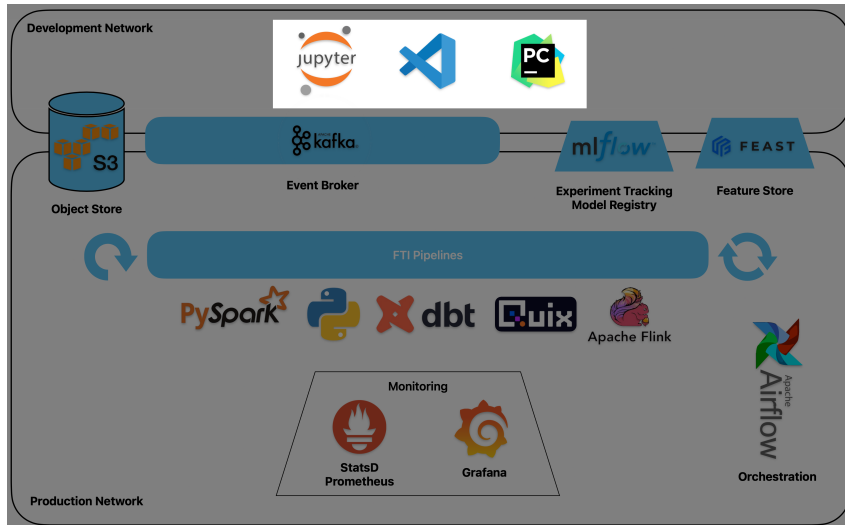

- ML Models live inbetween the responsibilities of
 - Data scientists (who build the models)
 - Data engineers (who build the data pipelines and use the models)
 - Operations engineers (who build and run the infrastructure)
- We need to understand the responsibilities and tools these groups use
 - As a data scientist, you need to be aware how the infrastructure works
 - As a data engineer, you need a basic understanding of Machine Learning
 - As a operations engineer, you need to know how models work and how to optimize them

Infrastructure Big Picture

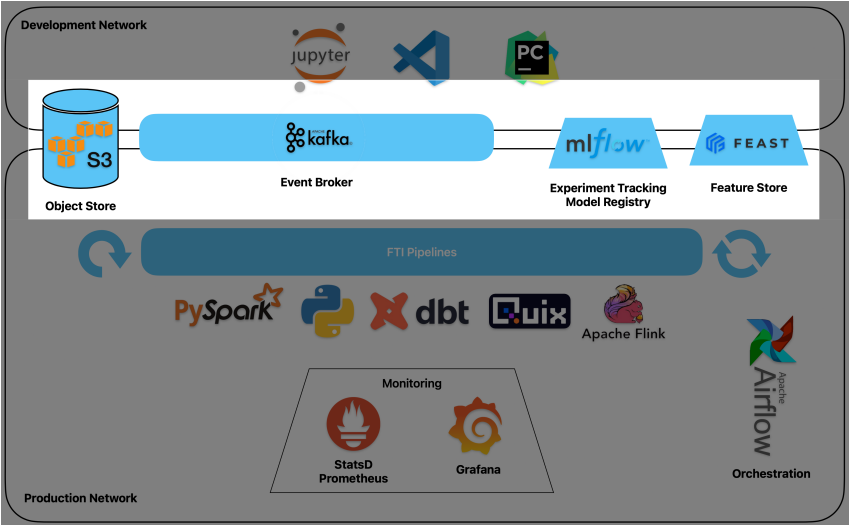

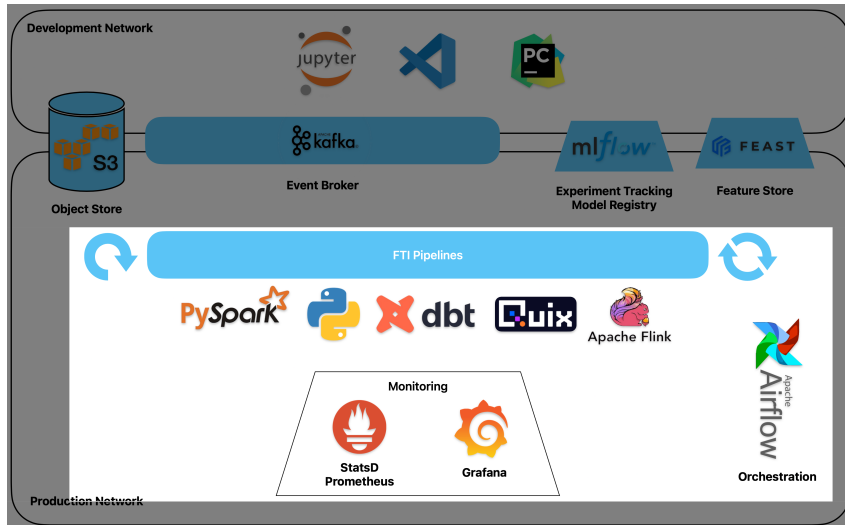

Development

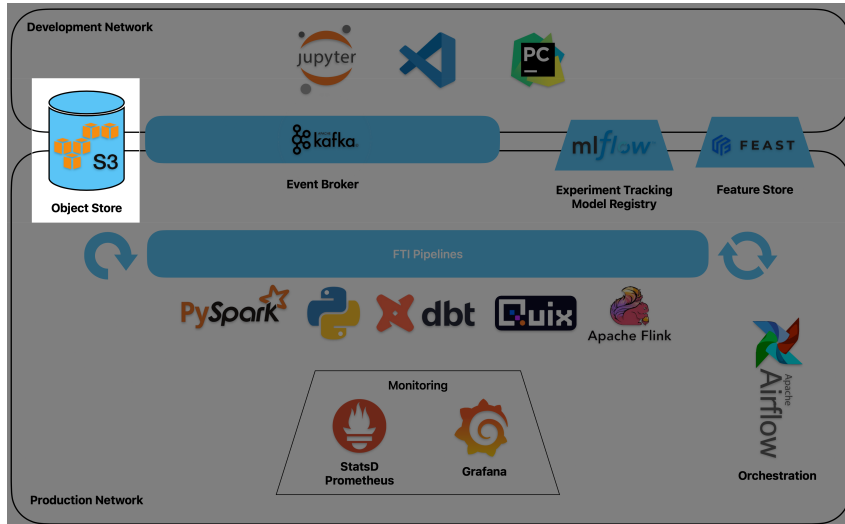

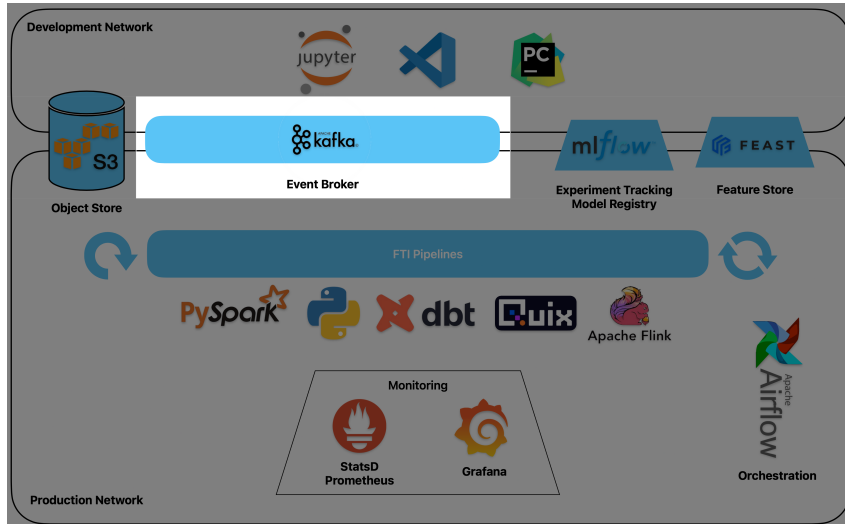

Shared Infrastructure

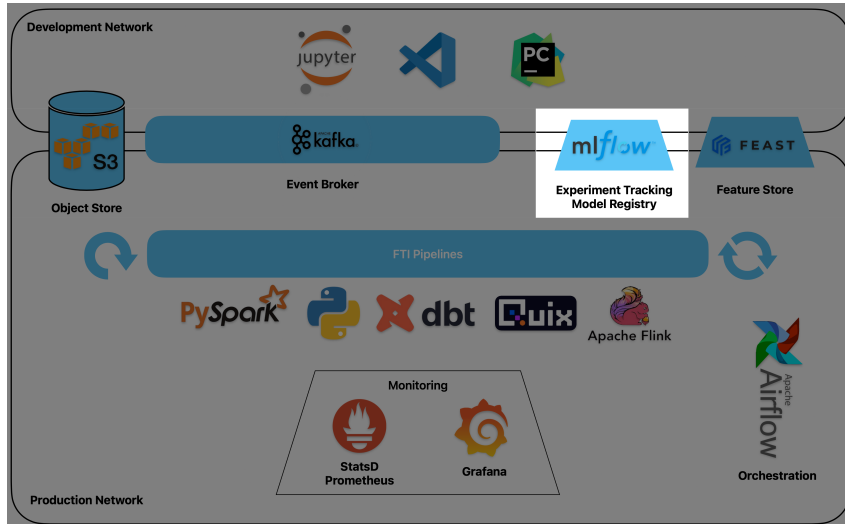

Object Store

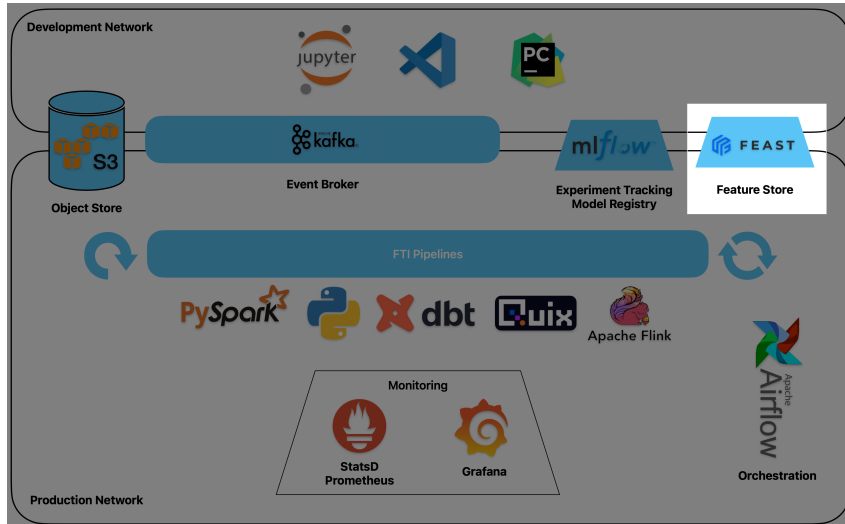

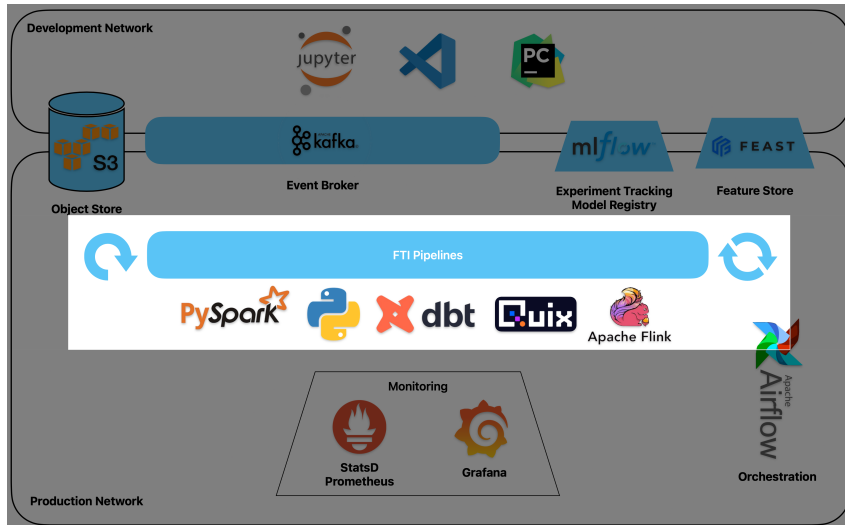

Model Registry and Experiment Tracking

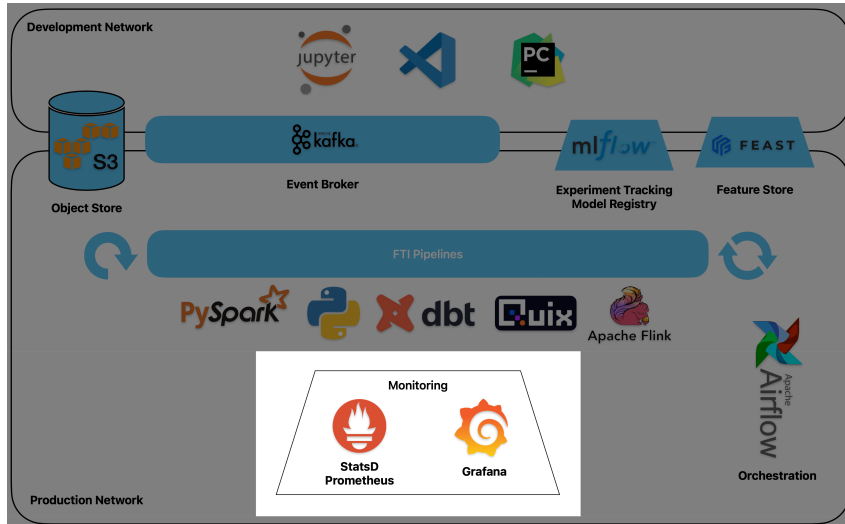

Feature Store

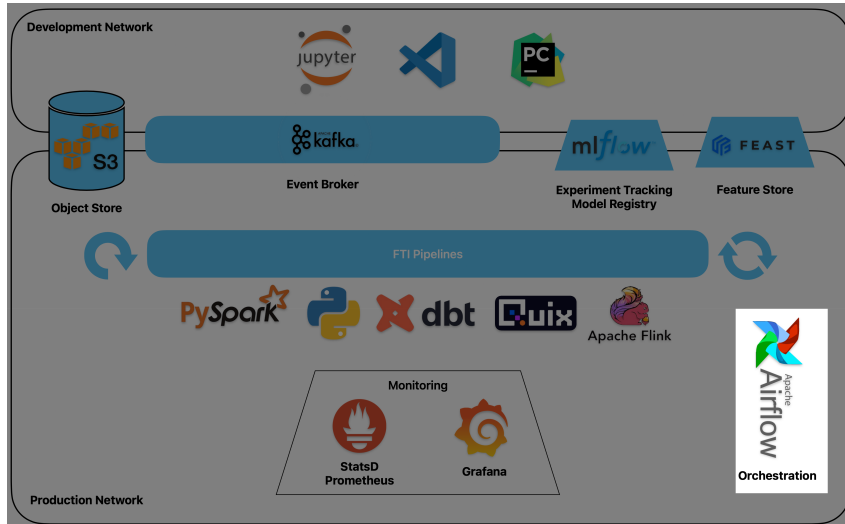

Batch and Streaming Pipelines

Monitoring

Orchestration
